

New VTB 820.VS

28"Hg Vacuum Blower with the Patented Venturi System providing up to **10 dBa sound reduction** without compromising reliability and performance.

Hibon Ingersoll Rand introduces the new 100% oil free **Three-Lobe Positive Displacement VS Series** Blower with patented sound reduction technology along with its incomparable brand **reliability** for the rigorous demands of the **vacuum truck industry** and **industrial** applications.

The **VS Series** is engineered to silence the pulsations inside the blower generating a sound wall.

This **new patented technology** includes **a Venturi** for a secondary air injection path into the air chamber while maintaining its advantage of direct air injection to stabilize heat rise.

The result translates **Hibon VS Series** into the **Quietest Blower available.**

Configurations
